

Task Three

I chose publisher for this task as it offered me a range of page layouts and one of these was business card.

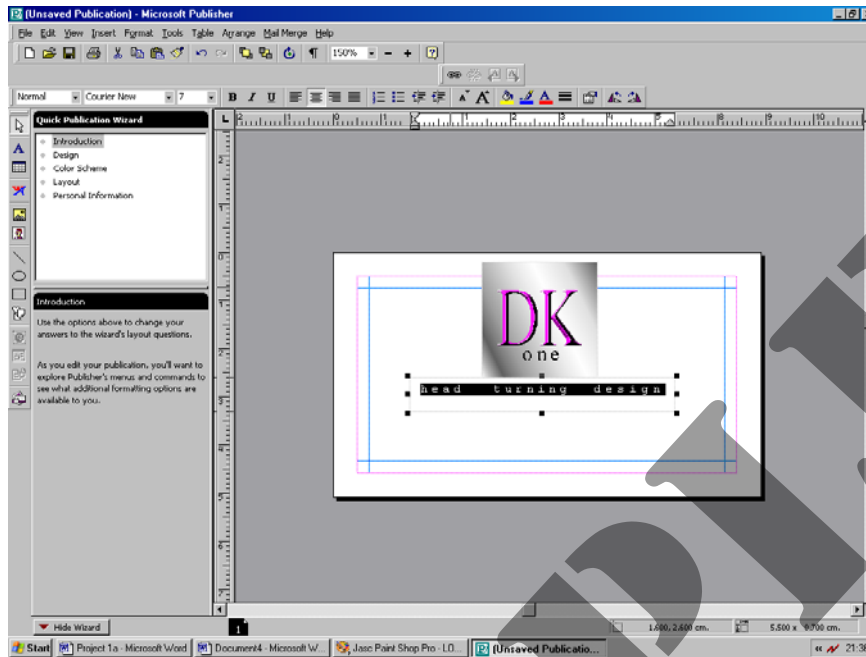

First thing I did was to copy and paste my logo from Paint shop Pro onto the page and place it in the centre of the card

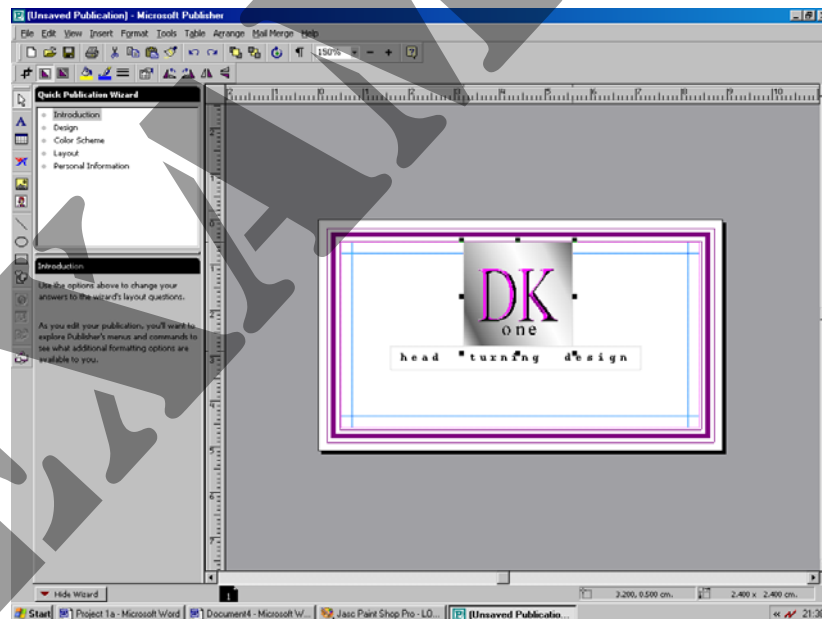

Using a text frame I typed in the slogan "head turning Designs" and pulled it central underneath the logo

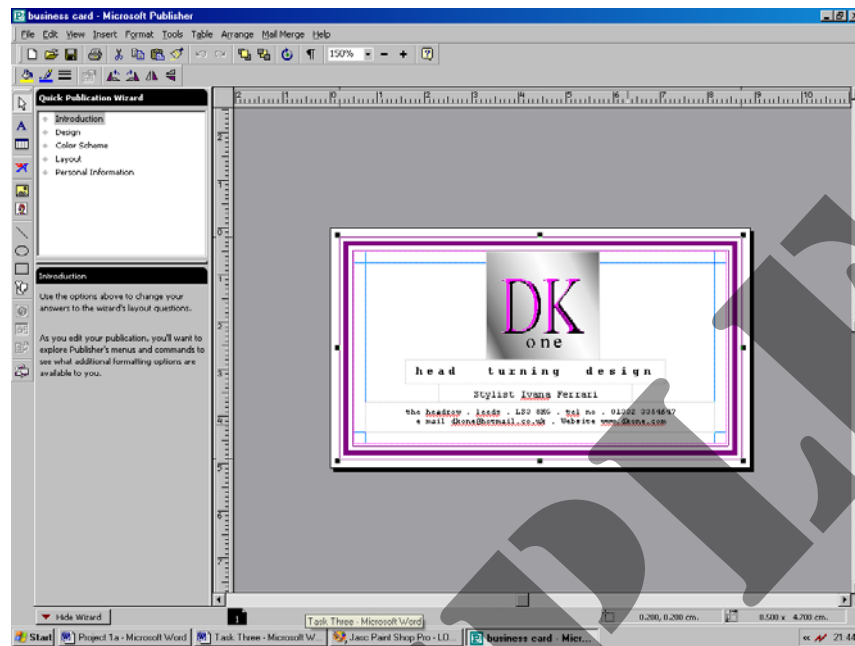

I used the Character spacing tool to experiment with the heading to make it look more contemporary

I then added a border using the frame tool and changing this to purple to fit in with the chrome and purple colour scheme

Finally I added another text frame and chose courier new to key into the address I chose this font as it's simple and legible yet it looks very modern.
