

Task Thirteen – Evaluation

In this final task, you must review all of the work in Project 1b. Begin by reminding us of why you were setting out to do this task: How did the shop do this work before you came up with an IT solution? In what ways does your solution make the problem quicker / easier to solve? How might you further improve on your solution? (You don't have to actually make the improvements).

This evaluation should be approximately 1 side of A4 (normal size text.) There should be no images in this report.
