

Task Eight

User Interface Designs

In this task you will need to draw out three different designs for the data entry screen that the staff at the database will use. Two of the design can be basic and not very user friendly but one of the designs must include drop down boxes, buttons that run queries and reports all from the interface.

Your design must be neat and show colour and labels with suggested font size and style. You may even want to include a logo on you design for the agency.

Your write up must talk about why you have used the colour, styles, buttons that you have for each option and then you must recommend which one you are going to choose and why.

Mark Scheme

Area	1 Mark	2 Marks	3 Marks	4 Marks
Produce Designs for the user interface	Produce an appropriate design for the user interface	Describe alternative appropriate designs for the user interface	Describe alternative appropriate designs for the user interface. Justify their choice of design for the user interface
