

Task 1b Steps to finding the weather

First of all I clicked on Internet Explorer to access Google search engine

I then typed in “ weather in Bruges” but this only brought up today’s weather

I typed into the search engine climate n Bruges and it brought up a seires of web page.

I read through the little “blurb” for each site and followed the link that said “weatherinfo.com”

This was perfect as it explained about the yearly climate in Bruges, in simple terms that was perfect for my information leaflet
